

Dear Sirs,  
RE: Petition 04-160

I am writing to show my support for XM's ability to provide indepth traffic and weather that is not available in the local market. The local radio stations do not provide timely information nor is the information available all the time. This service assists motorist get to their destination and in turn saves money as well as fuel.

Please consider the fact that the Weather Channel provides local weather on the internet and on cable. If this petition is approved then a very important service which protects lives and property would also be in jeapordy and possibly lost.

Sincerely,

Brian Poloniecki
